Group: 15.

GUIDED BY,

Dr. Mahmoud Wahdan

PREPARED BY,

Eslam Goma Ali,

Mohamed Hegazy

Version: 1.0.

Academic Year: 2026–2027.

System Actors

The Online Pizza Ordering System has different actors who use the system to perform specific tasks. Each actor has different responsibilities depending on their role.

Customer

The customer can view the available pizzas and their prices, choose pizza sizes and toppings, and add items to the shopping cart. The customer can review the order before confirming it, place an order for pickup, and check the order status.

Restaurant Staff

Restaurant staff are responsible for handling customer orders. They can view new orders, check the order details, update the order status during preparation, and mark an order as ready for pickup or collected.

Administrator

The administrator is responsible for managing the system. This includes adding new pizzas, updating prices, changing the availability of menu items, managing user accounts and permissions, and viewing sales reports.

External Payment Service

If online payment is included, an external payment service processes the customer's payment and sends the payment result back to the system. If customers pay only in cash, this actor is not needed.

The Online Pizza Ordering System allow Customers to pickup the order from the restaurant so the delivery services not included.
